

Nihar Joshi

Software Developer · Early career · Full-stack · React & Node.js · Pune, India

nihar.joshi2003@gmail.com | +917058250805 | LinkedIn | GitHub | Pune, India

PROFESSIONAL SUMMARY

Software Engineering Associate at Amdocs India (Jul 2025 - present), working on automation within the Ginger platform. Background in full-stack development with hands-on experience in React.js, Node.js, and Express.js through internship and personal projects. Passionate about building scalable web applications and seeking full-stack development roles to leverage my development skills in production environments. Full-stack projects: Newspaper Distribution System, HabitSync · React and Node.js expertise

CORE COMPETENCIES

React.js (hooks, functional components, state management)

JavaScript (ES6+)

HTML5 & CSS3

Tailwind CSS / CSS frameworks

Node.js

Express.js

RESTful API design

Authentication (secure login & access control)

MySQL

Basic database design and queries

Git & GitHub

VS Code

PROFESSIONAL EXPERIENCE

Amdocs India July 2025 – Present

Software Engineering Associate
Pune · 9 months (ongoing)

- Work on Ginger automation platform
- Support automation initiatives for web, mobile, and desktop applications
- Collaborate with cross-functional teams
- Learning:** Professional software development environment

Dtree Labs 3 months

Software Engineering Intern
React-based web application development

- Developed React components for customer-facing web applications
- Collaborated with senior developers and product team
- Implemented features based on design specifications and requirements
- Skills:** Professional React development in a team environment

PROJECTS

Newspaper Distribution & Billing System

Stack: React.js, Node.js, Express.js, MySQL, REST APIs

- Dashboard for managing newspaper distributions across multiple locations
- Automated billing system that calculates charges based on distribution metrics
- User authentication and role-based access control (Admin, Distributor, Accountant)
- Real-time inventory tracking and distribution status updates
- Monthly billing reports and payment history tracking
- End-to-end ownership: built both frontend and backend from scratch

HabitSync - Habit Tracking Application

Stack: React.js, Node.js, Express.js, MySQL, Tailwind CSS, Axios

- User authentication with secure password management
- Create, read, update, delete (CRUD) habits with custom categories
- Daily check-in system with date-based logging
- Streak tracking and progress visualization
- Statistics and analytics dashboard showing completion rates
- Demonstrates complete feature implementation from database to UI

Serverless Stock Pattern Detection

Stack: AWS (Lambda, DynamoDB, S3, CloudWatch), Python, Node.js, REST APIs

- Real-time ingestion of stock market data
- Pattern detection algorithms to identify trading opportunities
- Automated alerts when specific patterns are detected
- Historical data analysis and backtesting capabilities
- Cost-optimized with serverless pay-per-use model
- AWS Lambda functions for event-driven stock data processing
- DynamoDB for high-speed, scalable data storage of stock metrics
- S3 for storing historical data and backups
- Understanding of cloud-native architecture and serverless patterns

EDUCATION

B.E. Electronics & Telecommunications (ENTC) 2025

Pune Institute of Computer Technology (PICT) · CGPA 7.79/10

TECHNICAL SKILLS

Frontend: React.js (hooks, functional components, state management); JavaScript (ES6+); HTML5 & CSS3; Tailwind CSS / CSS frameworks

Backend: Node.js; Express.js; RESTful API design; Authentication (secure login & access control) **Database:** MySQL; Basic database design and queries

Tools & practices: Git & GitHub; VS Code; Postman (API testing); Basic command line / terminal

Growing: Advanced backend patterns; Scaling applications; AWS services (deeper dive); System design fundamentals
